JamaicaEye Website Cyber Incident

The Ministry of National Security is confirming that there has been a cyber-incident, which has preliminarily affected access to the JamaicaEye website. Importantly, this website is NOT connected, in any way, to the central infrastructure of the surveillance system. This means that there has been NO compromise to any video footage or evidence recorded by the JamaicaEye cameras.

The MNS is, however, unable to confirm if data, related to persons registering their interest to partner with JamaicaEye, have been exfiltrated. A team comprising of experts from the MNS, JCF and MOCA, is currently evaluating the extent of the breach and have commenced the investigation.

Further updates will be provided in a subsequent release.
